TABLE OF CONTENTS

FOREWORD

A pamphlet containing descriptive data on public sewer systems and sewage treatment plants in New York State was first published in 1927 and subsequently revised and updated in 1929, 1935, 1941, 1952, 1976, 1978, 1981, 1983, 1987 and 1992. Previously known as the New York State Health Department Bulletin No. 20 for the years 1927 - 1952, these publications satisfied a general demand for the descriptive information that is contained in the document. The 1981 issue represented the first time data had been computerized, facilitating accessibility in meeting user needs. The present issue is an updating of the 1992 edition and contains information which is current through November 1999. This update process included a survey of all POTW's. We obtained a response rate of 80 percent. Included in the appendix is a sampling of the various statistical comparisons that can be developed from the stored data. The following tables compare the types of facilities and plant design sees contained in this pamphlet with those that were shown in the 1952, 1980, 1985, 1987 and 1992 issues:

Treatment		Ν	lumber o	f Facilitie	S			To	tal Design F	Flow (MGE))	
Туре	1952	1980	1985	1987	1992	1999	1952	1980	1985	1987	1992	1999

	Totals	298	509	550	543	573	605

Table D

The large increase in the number shown in the < primary category for 1980 to 1985 is due to the fact that the 1985 figure includes raw discharges, sewer system overflows and a scavenger holding tank which were not identified in prior issues. The purpose of this "accounting change" is to improve the usefulness, flexibility, and compatibility of the Descriptive Data inventory.

No matter how sophisticated a management information system is designed, if the accuracy of the data is questionable, the usefulness of the system is compromised. The data base containing the descriptive data is updated on a continuous basis. If you notice any inaccuracies or have any questions, comments, or suggestions, it would be appreciated if this information were sent to:

New York State Department of Environmental Conservation Bureau of Watershed Compliance Programs Attn: Descriptive Data 50 Wolf Road Room 340 Albany, New York 12233-3506

or descdata@gw.dec.state.ny.us

Explanation of Codes

- Permittee Name, Facility Name The permittee and facility names are given using the notations: (C)
 - City; (T) Town; (V) Village; (H) Hamlet; SD Sewer District; STP Sewage Treatment Plant;
 EFC New York State Environmental Facilities Corporation; NYC DEP New York City Department
 on Environmental Protection. Privately owned facilities and those municipally-owned treatment
 plants which provide service other than to the general populous have been excluded.
- 2. <u>County Name</u> Refers to the county in which the treatment plant is located.
- 3. <u>SPDES Number</u> Refers to the New York State Pollution Discharge Elimination System permit number.
- 4. <u>Chief Operator</u> Refers to the person or business designated as chief operator by the permittee.
- 5. <u>Phone Number</u> Refers to the telephone number used to contact the chief operator.
- 6. <u>Receiving Waterbody</u> Indicates the name of the receiving waters to which the facility discharges.
- 7. <u>Drainage Basin</u> Indicates the major basin in which the discharge is located according to the following code:
 - 01 Lake Erie Niagara River
 - 02 Allegheny River
 - 03 Lake Ontario & Minor Tribs
 - 04 Genesee River
 - 05 Chemung River
 - 06 Susquehanna River
 - 07 Seneca Oneida Oswego Rivers
 - 08 Black River
 - 09 St. Lawrence River
 - 10 Lake Champlain
 - 11 Upper Hudson River
 - 12 Mohawk River
 - 13 Lower Hudson River
 - 14 Delaware River
 - 15 Passaic Newark Rivers
 - 16 Housatonic River
 - 17 Atlantic Ocean Long Island Sound
- 8. <u>Stream Class</u> Indicates the water quality classification of the receiving waters.
- 9. <u>Year Built</u> Refers to the year when the existing treatment plant was first constructed.
- 10. <u>Year Updated</u> Refers to the year in which the most recent improvement to the treatment facility were made.
- 11. <u>Design Flow (MGD)</u> Indicates the design flow of the treatment plant in units of million gallons per day, as indicated in the most recent SPDES permit.

12. <u>Plant Class</u> - Refers to the certification required for the chief operator based on scoring of the plant's treatment train:

Activated Sludge Treatment, with a definition of a biological treatment process in which a mixture of wastewater and activated sludge is agitated and aerated. The activated sludge is subsequently separated from the treated wastewater by sedimentation and wasted or returned to the process as needed.

- 4A plant score greater than 75 points
- 3A plant score between 56 and 75 points
- 2A plant score between 31 and 55 points
- 1A plant score or less than 30 points

Any biological oxidation process other than activated sludge.

- 4 plant score greater than 75 points
- 3 plant score between 56 and 75 points
- 2 plant score between 31 and 55 points
- 1 plant score or less than 30 points

Exemptions:

Septic systems followed by subsurface leaching facilities with eventual discharge to ground waters, regardless of design capacity; Septic tanks followed by open of covered intermittent sand filters, with design capacity less than 50,000 gpd; and wastewater treatment plants which treat industrial wastes exclusively; are exempt from having a certified chief operator or assistant/shift operator.

- 13. <u>Population Served</u> Refers to the estimation of people living within the service area and connected to the facility.
- 14. <u>Number Employees</u> Refers to the number of employees at the facility. The term "+P/T" refers to the fact the facility also has some part time employees.
- 15. Collection "S" indicates that the tributary collection system is a separate one; "C" indicates a combined sewer system.
